DETAILED ACTION

Acknowledgement is made of Applicants' IDS received 23 August 2004. A completed, signed SB08a will be accompany the next office action because Examiner is obtaining the foreign art references.

Drawings

The drawings are objected to because: in Figures 1-4 the “,” is used as a decimal point which conforms to European mathematical practice. The “,” should be changed to --.-- so as to conform to US mathematical practice for the decimal point. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as “amended.” If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either “Replacement Sheet” or “New Sheet” pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and

informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 15-19 and 21 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 13, the independent claim, the transitional phrase is "consisting of". Claims 15-19 and 21 are improper dependent claims because they add an element. See MPEP 2111.03 for the proposition that "[a] claim which depends from a claim which "consists of" the recited elements or steps cannot add an element or step."

Allowable Subject Matter

Claims 13, 14, 20, and 21 are allowed over the art of record.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Persson et al. is a patent for the same inventors. Langlet discloses the use of GUDN as an explosive.
